SUMMARY

Full-Stack Developer and Cloud/AI Engineer with 4+ years of experience building web, desktop, and mobile applications. I help businesses across industries, including industrial and process-driven sectors — add AI capabilities to their products: chatbots, RAG systems, automation workflows, and intelligent serverless backends built on AWS Bedrock, Lambda, and modern AI APIs. I take full ownership from architecture to deployment. Clean code, clear communication.

SKILLS

Frontend: React, Next.js, JavaScript (ES6+), HTML5, CSS3

Backend & Databases: Node.js, Laravel, PHP, JAVA, Python, REST APIs - MySQL, PostgreSQL, MongoDB, SQLite

Cloud & DevOps: AWS (Bedrock, Lambda, API Gateway, DynamoDB, S3, CloudFront, EC2, RDS, ELB, Auto Scaling, EFS, Route 53, ACM, VPC), GitHub Actions, CI/CD, Docker

AI & Automation: AWS Bedrock, OpenAI API, RAG / Knowledge Base integrations, n8n automation workflows

Tools: Git, WordPress, Supabase

Mobile & Desktop Development: React Native, Flutter - JavaFX, Tkinter (Python GUI), Electron.js

Languages: Arabic (Native), French (Professional), English (Fluent)

WORK & INTERSHIPS

- **Full-Stack Developer Intern — M Innovation | Jun 2024 – Aug 2024 | Marrakesh, Morocco**
Built a React-based task management application with full CRUD functionality
Delivered a complete internal tool from scratch across the full stack
- **Full-Stack Developer Intern — NEWDOOR Real Estate Agency | Jun 2023 – Jul 2023 | Marrakesh, Morocco**
Agadir, Morocco Full-Stack Developer Intern Created a React task management application
- **Freelance Full-Stack & AI Developer — Upwork | 2025**
Delivered a client web project end-to-end, earning a 5-star rating on first completed job

PROJECTS

- **Hotel Reservation System** — Worldwide hotel reservation system built with Supabase and React
- **E-Commerce Platform | MERN Stack • EC2 • S3 • CloudFront • ELB • Stripe** — Full-stack e-commerce platform with auto-scaling AWS infrastructure and Stripe payments, Handles 100k+ monthly users with under 1s load times
- **AI Customer Support Chatbot | AWS Bedrock • Lambda • API Gateway • React** — RAG-based chatbot that answers questions from company documents via a React chat widget
Fully serverless on AWS — retrieves context from a Bedrock knowledge base and responds via Claude
- **Serverless Contact Form** — Secure spam-protected contact form with validation, database storage, email forwarding, rate limiting and admin dashboard. Cost: \$0.50/month *Tech: Lambda • API Gateway • DynamoDB • SES • React/JavaScript*
- **Industrial Process Monitoring Dashboard | Lambda • DynamoDB • IoT Core • React**
Real-time dashboard for monitoring industrial sensor data (temperature, pressure, chemical levels)
Serverless architecture on AWS — processes IoT data streams, triggers automated alerts, stores historical logs
React frontend with live charts and threshold-based notifications

EDUCATION

Ibn Zohr University — Agadir, Morocco	Software Engineering (Master's Degree)	2025 – 2027
Ibn Zohr University — Agadir, Morocco	Software Engineering (Licence Degree)	2024 – 2025
Higher School of Technology — Meknes, Morocco	Web & Mobile Development (DUT)	2022 – 2024
